## AMENDMENTS TO THE ABSTRACT

Please replace the Abstract of Disclosure on page 29 as follows:

### **METHOD FOR CONSISTENT ON/OFF OBJECT TO CONTROL RADIOS AND OTHER INTERFACES**

#### Abstract of Disclosure

In a method and system for controlling a device coupled to an information handling system, an object is defined to include a hardware and software component having a corresponding hardware operating state and a software operating state. The hardware component is operable to receive at least one hardware input, which is indicative of a target hardware operating state. The software component is operable to receive at least one software input, which is indicative of a target software operating state. A coordination component is included in the software component to receive the ~~at least one~~ hardware and software inputs, and control the operating state of the device in response to the target hardware operating state and the target software operating state.
